A hand holding a clear petri dish containing several light-colored capsules. The background is a dark, close-up image of cannabis plants with serrated leaves and developing flower buds. The text 'HELLENIC DYNAMICS+' is overlaid in white, with the '+' symbol positioned above the 'S' in 'DYNAMICS'.

HELLENIC DYNAMICS+

HELLENIC DYNAMICS

Established in 2018, Hellenic Dynamics acquired a 200,000 m² facility and made all necessary applications resulting in a licence to cultivate and export high THC medical cannabis flowers. Developing high quality TCH genetics, in collaboration with leading partners worldwide, they are committed to the production and delivery of high quality medical cannabis in all developing European markets.

This product is extremely vulnerable, which is why the protection of these areas requires high technology equipment as well as specialized technical studies of the area, components that we, at K2 Security, have. The above are essentials to secure the specific area in the best possible and technologically advanced way.

We used more than 150 IP cameras with fiber optics, in a coverage perimeter of about 2,500 meters. The cameras used, are state-of-the-art with video analytics capabilities and high resolution, features corresponding to the level of the specific installation. The alarm system we installed is perimeter coverage with infrared beams in the fence, while Access Control systems were installed in each area, so that the entrance is controlled everywhere.
